EDUCATIONAL PROGRAM STANDARD FOR ACCREDITATION

A. ISSUES RELATED TO THIS STANDARD

The following requirements ask the school system to provide a self-assessment of expectations for quality included in this Standard for Accreditation. The information and data requested in this section are not for evaluation purposes. Instead, the information and data will assist the system in making the determination whether it meets the Standard and its Indicators of Quality.

B. SELF-ASSESSMENT OF THE INDICATORS OF QUALITY

The school system must meet this Standard for Accreditation to be granted "Accreditation" by the Middle States Association. The Indicators of Quality for the Standard identify the types of evidence that, when taken together, indicate whether the school system meets the Standard. Rate the degree to which the school system meets each Indicator by using the following scale:

| Rating of Adherence to the Indicator | | | | | |
|--------------------------------------|--|--|--|--|--|
| 1. Does Not Meet | The evidence indicates the school system does not meet | | | | |
| | the expectations of this Indicator | | | | |
| 2. Partially Meets/In | The evidence indicates that the school system partially | | | | |
| Need of Improvement | meets the expectations of this Indicator and is in need of | | | | |
| | improvement | | | | |
| 3. Meets | The evidence indicates the school system meets the | | | | |
| | expectations of this Indicator | | | | |
| 4. Exceeds | The evidence indicates the school system exceeds the | | | | |
| | expectations of this Indicator | | | | |

Middle States Association Accreditation Standard Educational Program

The Standard: The school system's educational program consists of a carefully planned and well-executed curriculum that includes appropriate academic standards, solid pedagogy, and assessment practices, all based on research and best practices. The educational program is aligned with the school system's mission/philosophy, approved by the governance, sufficiently financed, and reviewed regularly to ensure its appropriateness and effectiveness. The educational program is developed to address the needs of all students and is designed to foster and challenge student learners at all levels. Effective policies and procedures regarding the educational program are in place, along with instructional materials, technology, and equipment that are appropriate, functional, and well maintained. Written curriculum guides are current, functional, available, and implemented for the instruction of students. The guides

define the scope and sequence of the educational program as well as the program's objectives and reflect sound approaches to teaching and learning.
