

CPS SYSTEMS OVERVIEW

CPS allows you to:

- Construct, organize, and deliver your own interactive set of questions.
- Create review materials to deliver in a competitive, fun, and fast-paced learning environment.
- Run CPS and another software application, like PowerPoint, simultaneously; access the on-screen CPS bar for a Verbal question; or select predefined questions.
- Input standards based on your school's, district's, or state's requirements and create questions that measure those standards.
- Print questions in traditional paper format.
- Instantly receive and grade homework, reviews, tests, and standards measurements.
- Generate detailed reports on each student's performance.
- Take and record attendance in a quick, fun way.

Types of CPS Systems:

- IR – Infrared
 - Must be aimed at hub (airport) to receive data
 - No text or numeric answers with this system
- RF – Radio Frequency
 - LCD screen allows students to see response
 - Works with USB connection (no aiming required!)
 - Text and numeric answers can be accepted

Types of Questions You Can Create:

- Chalkboard
- Multiple Choice
- True/False
- Yes/No
- Numeric
- Answer Series
- Short Answer

Benefits of Using a CPS System:

- Increased student engagement
- Immediate feedback to student and teacher
- Simple grading/time saver
- Easy to edit a lesson once it's created

Drawbacks of Using a CPS System:

- Time to learn the system
- Can be difficult to create higher-level Bloom questions
- Time consuming to create lessons
- Cheating
