SUBJECT: Community Use of the High School Fitness Center
DATE: June 21, 2011

For the 2010-2011 school year the School Board eliminated the user fee for Southern Lehigh community members to use the Fitness Center at the High School. This decision was a popular decision for many member of the Southern Lehigh community. During the 2009-2010 school year there were 51 registered members for the Fitness Center. The final membership total for the 2010-2011 school year was 207 registered members. With the increase in membership came the increase in the use of the fitness center by the Southern Lehigh community members.

We received many favorable comments about the elimination of the user fee. The elimination of the user fee also enabled mothers/fathers to use the facility with their children if they so desired. The ability of the Southern Lehigh community to use the Fitness Center at the High School has been a positive decision by the School Board.
