
JPLIS School Safety

— Drills, Preparedness, and ALICE —

Your safety is our #1 priority

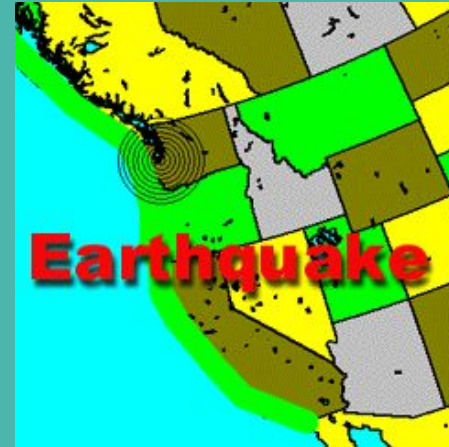

SAFETY

This is why we practice, and have drills

We have tornado, earthquake, medical, lockdown, evacuation, and fire drills

What about a drill for a “dangerous someone”?

ALICE

Alert

Lockdown

Inform

Counter

Evacuate

Alert

We can do this through a building announcement

Listen carefully when you hear announcements
being made

Information can be shared

We all can make the best decision possible

Lockdown

Teachers will close locked doors

Teachers might have some special directions

Stay quiet, stay out of sight

Listen for your teacher's directions

Inform

Listen to the adults around you

If you notice something, or someone dangerous, let an adult know

Listen and follow the directions of the school staff

Counter

Your teacher may ask you to...

Run away

Make loud noises, scream

Consider other options

These responses are a last resort!

Evacuate

Leave the building

Follow your teacher's teachers
directions

Know where to meet-up, rally point

How can we prepare and practice using ALICE?

We will have our first drill close to the end of this month, or beginning of next

We will **A**lert using our announcement system

We will **I**nform with announcements throughout the drill

You may need to **L**ockdown

You may need to **E**vacuate

You teachers will explain when, where, and how we might **C**ounter
